ISO Rates City of Greenacres Fire Protection Services among the best in Florida

The Insurance Services Office, Inc. (ISO), a leading source of information about property/casualty insurance risk, has recently completed an assessment of the City's fire protection services through the Public Protection Classification (PPC™) program and has assigned the City of Greenacres a PPC of 2 (effective April 2015) which is an improvement over the previous PPC of 3.

ISO's PPC Service evaluates the capacity of the local fire department to respond to and fight structure fires and PPC grades run from Class 1, which generally represents superior property fire protection to Class 10, which indicates that the area's fire-suppression program does not meet ISO's minimum criteria.

ISO's Public Protection Classification (PPC™) information plays an important part in the decisions insurers make affecting the underwriting and pricing of property insurance. Most U.S. insurance companies use PPC information when deciding coverage to offer and prices to charge for personal or commercial property insurance. Assuming all other factors are equal, the price of property insurance in a community with a good PPC is lower than a community with a poor PPC.

According to ISO, out of 682 communities in the Florida only 49 have a PPC of 2 or better. The City of Greenacres with a PPC of 2 is very proud to be in this group that provides superior fire protection.
